

SUSTAINABLE SOLUTIONS WASTE WATER TREATMENT

————— YOUR SUSTAINABLE SOLUTIONS PARTNER —————

ABOUT OUR WASTE WATER SOLUTIONS:

IAN brings cutting-edge water treatment technology from our Australian partner OZZIKLEEN.

OzziKleen:

- A trusted provider of water and wastewater treatment solutions.
- Known for cutting-edge technology, eco-friendly designs, and robust systems.
- Serving residential, commercial, industrial, and municipal clients worldwide.

TYPES OF OZZIKLEEN SOLUTIONS

Residential Systems

- Grey Water Systems
- Residential RP10 Systems
- Lifting Stations

Commercial Systems

- Transportable Systems
- Commercial Systems

Portable Systems

- Skid Systems
- Transportable Systems

Marine Systems

- Transportable Systems
- Commercial Systems

RESIDENTIAL WASTE WATER TREATMENT SYSTEMS:

Ozzi Kleen Household Sewage Treatment Systems allow you to reuse all your household water for keeping lawns and gardens lush and green.

Ozzi Kleen Sewerage Systems act as a digestive system using a unique cyclic fully aerobic sewage treatment process. This means there is no septic process, so no septic smells, it's environmentally friendly producing nutrient rich water to reuse on gardens, and is cost efficient to run (only half the running cost of other aerobic sewerage systems).

- Easy & Cost Effective to Install.
- Almost invisible when installed.
- Produces treated water for reuse.
- 15 year warranty.
- Safe and environmentally friendly.
- No Septic process - 100% aerobic.
- Easy & cheaper to install – almost invisible.
- Cost effective & reliable.
- Built to last.

COMMERCIAL WASTE WATER TREATMENT SYSTEMS:

Ozzi Kleen provides quality reliable on-site sewage treatment systems for both transportable and permanent applications.

- Quick mobilization and demobilization.
- Robust, compact, easily transportable.
- Plug and play solution.
- Equipped with programmable logic controller. (PLC)
- Minimal maintenance requirements.
- Manufacturer's warranty.
- No septic process.
- Caters to peak periods using a SBR technology.
- Capacity can be increased.
- Fully lockable systems available.
- Ideal for remote locations, temporary accommodation, mining and construction camps, towns, resorts, caravan parks, schools, airports.

PORTABLE /CONTAINERIZED WASTE WATER TREATMENT SYSTEMS:

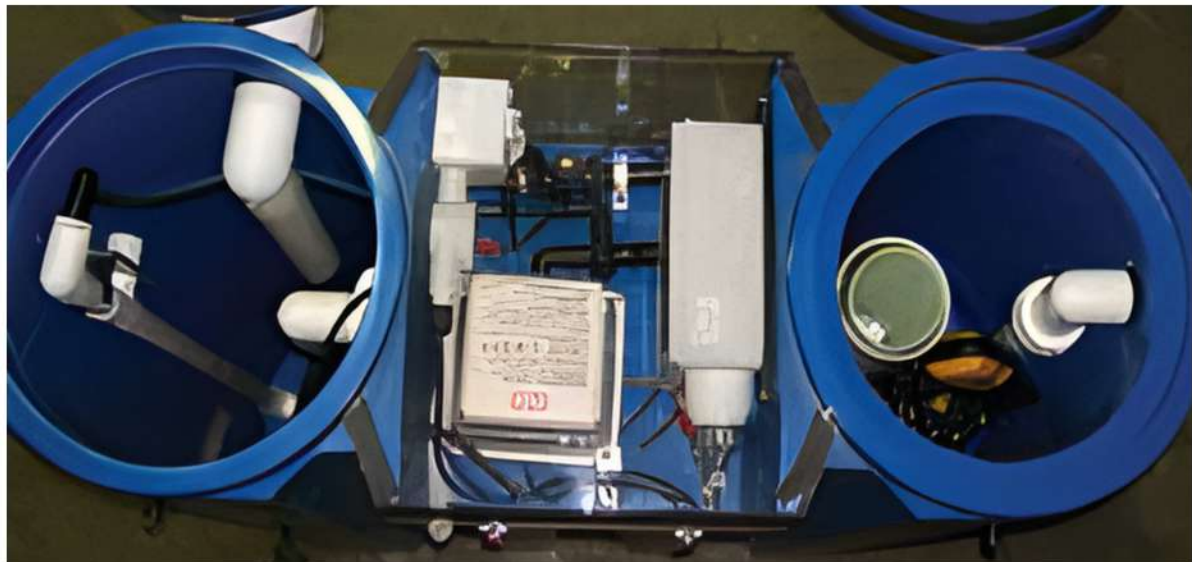

Ozzi Kleen Containerized Transportable Wastewater Treatment Plants are built in a shipping container so they can be easily transported by truck, boat or train to temporary or remote locations.

Our experienced team can offer you containerized wastewater treatment solutions to be completed quickly, affordably and with the reliability of successful results using the best available technology.

Ozzi Kleen Containerized Transportable Wastewater Treatment Systems operate on a fully aerobic treatment process which is a variation of the activated sludge technology. It is this technology, which offers reliable operation with many more advantages.

- Plug and play with minimal set-up
- No unpleasant odours
- Simple to operate controls
- Low maintenance
- Easily secured and mobile
- Our systems use a combination of poly tanks and waterproof coatings to prevent corrosion
- Modular design

MARINE WASTE WATER TREATMENT SYSTEMS:

With restrictions on discharge of waste water becoming a sensitive issue for Boat Owners, Governments and Environmental Departments, We have designed and developed a treatment system to address the issues that are affecting the marine industry.

There are two distinct processes utilized by the Ocean Kleen system for applications which involve:

- I. Treatment of black water using saltwater flush toilet systems
- II. Treatment of black and grey water using only freshwater toilet systems and other fixtures

Features:

- Polyethylene roto-moulded tank
- Easy to handle and lightweight
- Speed of installation
- Easily transportable
- Simple connections on site
- Department of Health fully compliant
- High volume emergency storage
- Installation on or below deck
- Cost effective to run

OZZI KLEEN APPLICATIONS:

- 1 Residential complexes and urban housing projects.
- 2 Hotels and resorts for greywater recycling and reuse.
- 3 Industrial setups requiring customized treatment solutions.
- 4 Agricultural irrigation using treated waste water.
- 5 Municipal wastewater management systems.

KEY FEATURES:

Why Choose Ozzikleen?

-  **Eco-Friendly Designs:** Minimizes environmental impact.
-  **Low Operating Costs:** Energy-efficient solutions for sustainable operations.
-  **Compliance Certified:** Meets global and regional water quality standards.
-  **Compact and Modular Systems:** Easy to install and scalable for future needs.
-  **Advanced Technology:** Superior filtration and treatment capabilities.

Environmental Benefits

-  Saves natural water resources through efficient recycling and reuse.
-  Reduces carbon footprint with energy-efficient operations.
-  Complies with stringent wastewater disposal regulations.

VALUE PROPOSITION:

WHAT SETS US APART?

Tailored Solutions: Customized to meet unique client needs.

Sustainability: Promotes water conservation and resource reuse.

Reliability: Proven performance under diverse environmental conditions.

After-Sales Support: Comprehensive training, maintenance, and service packages.

Cost-Effective: Reduces water and energy expenses over the long term.

OUR SUCCESSFUL CLIENTS

DULSCO

The capacity to treat 200 cubic meter per day using MBBR technology.

ETP system which has capacity to treat 60 CMD

We provided OzziKleen Sewage Treatment System RP 10 and GTS 10 with a total of 39 units for Anantara World Island hotel.

STP for mosque and Sh. Hamdan's stable (labour camp), Mushrif park and Nad Shama park for a total capacity of 50 CMD using SBR and MBR technologies.

35 CMD STP for Unilever Home Dubai and Lipton using SAFF technology.

STP system for Emirates Civil Defence Academy in Al Aweer with a capacity of 600 CMD along with fire fighting system.
